

Use our ring sizer to measure your finger

1. Print this document (if you have a printer) using these specifications: Size A4 and make sure 'Fit to page/printable area' is NOT selected.
2. Cut out the ring sizer tool
3. Place the ring sizer around your finger and pull the end through the slot you made
4. Pull the end to a point where you find it comfortable around your finger then read the letter the arrow is pointing to find your ring size

(Make sure you are able to slide the ring sizer over your knuckle comfortably because if it's too tight you will get the wrong size)

Use our ring size chart to measure your finger

1. Using a piece of string, measure your finger. The corresponding circumference will tell you your ring size.
2. Or, using a ring you already own, lay it on top of the circles until you find one that fits perfectly.

These measurements are just a guide. It is always best to try on the ring.

Key

D. Diameter

C. Circumference

This ring size chart is presented in British finger size letters indicated in circles. The metric diameter and circumference measurements are listed below each ring size. The chart is presented as a guide only. For an accurate measurement ask a member of our team.
